Shae Kuhnke

https://www.shaekuhnke.com | (920) 716-2890 | shaekuhnke@gmail.com

Software engineer specializing in full-stack development and application design. Experienced building user-facing products from concept to deployment using Agile methodologies. Passionate about solving complex problems through clean code, collaboration, and creative technical solutions.

EDUCATION

Bachelor of Science in Computer Science **Dec. 2024**
University of Wisconsin-Milwaukee, Milwaukee, WI 3.34 GPA

Relevant Courses: Artificial Intelligence, Algorithm Design & Analysis, Programming Language Concepts, Natural Language Processing, Application Development, Computer Security, Software Engineering, System Programming, Data Structures and Algorithms, Discrete Information Structures

SKILLS

- **Programming Languages**: Java, Python, JavaScript, TypeScript, C, HTML/CSS, SQL
- **Frameworks & Tools**: React/React Native, Node.js, Django, REST APIs, Git, Apache POI
- **Cloud & Deployment**: AWS, Heroku, PythonAnywhere
- **Development Practices:** Agile/Scrum, Test-Driven Development, DevOps, Version Control

EXPERIENCE

Generalist Expert | *Mercor* | *Remote* **May 2026 – Present**

- Evaluate AI-generated business documents against writing-quality standards, flagging vague phrasing, overused stylistic patterns, and unprofessional tone to improve model output
- Provide high-level feedback with a human-based training pipeline to train AI models to produce business content

Founder & Full-Stack Developer | *SK Solutions LLC* | *Appleton, WI* **June 2024 – Present**

- Own and operate a small business (sksolutions.dev) specializing in Django-based websites and web apps for small businesses upgrading their design or building from scratch
- Designed, developed, and deployed production client sites, including jmwtransfer.com and integrityroofinspection.services, using cloud hosting (AWS, Heroku)
- Engineered an online job application system that generates PDFs and routes them to HR via email, eliminating paper-based processes and reducing application processing time by 90%
- Built responsive contact forms with email integration for client estimates and service inquiries; provide ongoing IT support and Google Workspace administration for client organizations

Data Analyst | *JMW Transfer Inc.* | *Appleton, WI* **Nov 2022 – Present**

- Analyze driver logistics data to generate tax-compliant reports and inventory summaries using Excel
- Create and maintain internal software tools that reduce manual calculations by 90%, developed using Apache POI to enable non-technical employees to generate audit-ready reports
- Process and submit invoice data for 150+ weekly loads across two major client accounts, ensuring accurate billing and timely payment, fully remote with strong self-direction and time management

IT Intern Lead | *Hortonville Area School District* | *Hortonville, WI* **Summer 2022 & Summer 2023**

- Led a team of interns to upgrade and configure the district's computer network infrastructure for 4,000+ students and staff for a school referendum, including setup and testing of new IT equipment

PROJECTS

Senior Capstone Project – UWM Boss **2024**

- Led full-stack development of a transportation app serving 25,000+ UWM students using Agile methodology
- Solved critical user safety and accessibility challenges by implementing real-time queue position tracking, in-app driver-passenger messaging with automatic dispatch logging, and an incident reporting system

Turn-Based RPG Game – Ongoing Personal Project **Mar 2022 – Present**

- Designed and developed a complete 2D RPG game engine in Java with 50+ active players and regular content updates distributed through custom-built game website
- Built custom UI framework with original art assets to maintain cohesive design across 70+ game screens
